To Whom It May Concern:

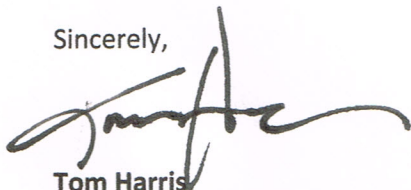

Dynacom is a leading manufacturer of copper and fiber optic structured cabling products established in 1984. Dynacom is a privately held USA corporation headquartered in Hayward, CA with manufacturing facilities and partnerships in multiple locations worldwide. The vast majority of Dynacom products are manufactured in the country of Taiwan. All of the products made in Taiwan are fully compliant under the United States Trade Agreement Act, Federal Acquisition Regulation (FAR) 52.225-5 (known as TAA). Dynacom products are also GSA listed and approved for purchase by US government agencies. These designations are key differentiators that separate Dynacom from other competitors that rely primarily on products made in non-TAA compliant countries such as China or India. More information on the TAA (Federal Acquisition Regulation (FAR) 52.225-5) along with a list of designated countries can be found at the following link: <https://gsa.federalschedules.com/resources/taa-designated-countries/>. The TAA designation allows Dynacom products to be utilized in any project requiring products that require products designated "Made in the USA", "Buy America Act", or similar stipulation. Only TAA designated products are considered USA equivalent substitutes under the TAA guidelines and their country of origin must be listed in Federal Acquisition Regulation in order to obtain this status.

Dynacom connectivity products are UL Listed and manufactured to rigid quality and performance standards that exceed ANSI/TIA-568 standards. Dynacom offers a 25 Year, certified product warranty, called SmartLink, for installations made through our network of factory certified installers (SCR's – SmartLink Contractor Representative). Dynacom products can be found installed nationwide in a myriad of large and small corporations and government settings including the North Carolina DOT, Fidelity Investments, Duke Medical Center, US, Air Force, US Navy, US Army, Veterans Administration, and the FBI. Dynacom is a favorite of numerous school systems such as Raleigh/Wake County Public Schools, Winston-Salem/Forsyth County Schools and relied upon by Appalachian State University and Campbell University Law School. We have many other notable installs including the Mercedes-Benz Stadium (home of the Atlanta Falcons), and our shielded CAT6 products were relied upon by NBC broadcasters under the extreme weather conditions found during Super Bowl LII which was played at US Bank Stadium in Minneapolis.

**Dynacom's TAA designation specifically applies to all category jacks (including CAT5, CAT6, CAT6A), patch panels (including CAT5, CAT6, CAT6A), and various copper connectivity products for audio and video applications. All of these products are manufactured in Taiwan.**

Thank you for your interest in our products. Should you have further questions, feel free to contact me at email listed below.

Sincerely,

**Tom Harris**
